Emma Nagano

FRONTEND DEVELOPER

Pampanga, PH | emmanagano.com | emmaruthnagano@gmail.com | github.com/emmanagano | linkedin.com/in/emma-nagano-4a0483246

Summary

Frontend developer building fast, accessible, SEO-ready websites with React, Next.js, and TypeScript. Recently began freelancing and launched two client sites, taking each from build through analytics, DNS, and go-live. Brings a year of remote agency web support experience troubleshooting WordPress sites and running domain transfers and launches.

See my projects, case studies, and coding challenges at **emmanagano.com**.

Technical Skills

Frontend: TypeScript, JavaScript (ES6+), React, Next.js, Astro, HTML5, CSS3, Tailwind CSS, Framer Motion
Backend & data: Supabase, Node.js, Express, PostgreSQL, REST APIs
SEO & analytics: On-page SEO, JSON-LD structured data, Google Analytics, Tag Manager, Search Console
Tools & deployment: GitHub, Netlify, ESLint, WordPress, DNS configuration
AI tools: ChatGPT, Claude, Claude Code, Google Gemini, NotebookLM

Projects

Fine Jewelry E-Commerce Store

Case study / Code

Next.js · React · TypeScript · Tailwind CSS · Framer Motion · Supabase · Netlify

- Built and deployed a working storefront for a concept fine jewelry brand, with products served from a Supabase database.
- Implemented user sign-up and login, plus a cart and wishlist that stay in sync across browser tabs.
- Added Framer Motion animations and reusable UI components, typed end to end in TypeScript.

Personal Portfolio

emmanagano.com / Code

Next.js 16 · React · TypeScript · Tailwind CSS v4 · Framer Motion · EmailJS · Netlify

- Designed and built a fully static Next.js site, with content managed in typed TypeScript data files.
- Created light and dark themes with CSS variables, plus a Node script that checks color contrast for every theme.
- Animated scroll reveals with Framer Motion that respect the user's reduced-motion setting.
- Set up JSON-LD structured data, a generated sitemap, Tag Manager analytics, and an EmailJS contact form with a spam honeypot.

Experience

Freelance Web Developer · Self-employed

2025 – Present

- Launched two client websites, handling the build, on-page SEO, analytics setup, and DNS through go-live.
- Set up Google Analytics and Search Console on each site before launch so clients could track traffic from day one.

Web Support Specialist · ollyolly.com · Remote, full-time

2024 – 2025

- Resolved 7–13 support tickets per shift across client WordPress sites, from plugin conflicts to broken layouts.
- Configured DNS and completed domain ownership transfers between registrars, such as Wix to GoDaddy, for client launches.
- Audited client sites for issues and escalated code-level fixes to the engineering team.
- Installed and configured the company's WordPress themes to match client designs and requirements.
- Set up Google Analytics and Search Console so clients could track traffic and search performance.
- Worked in Agile sprints, tracking work in Jira, Slack, and HubSpot.

Education

Full-Stack Web Development · UNF Coding Bootcamp (powered by Fullstack Academy)

2021 – 2022

- Six-month part-time program in the PERN stack (PostgreSQL, Express, React, Node.js), finishing with an e-commerce capstone.
